You want to go 'Light and Fast' but you need a backcountry shelter that breathes. The SOL Escape Lite Bivvy was developed especially for you! Constructed with our proprietary Escape fabric and with a minimalist design the Escape Lite weighs in at only 5.5 oz and packs incredibly small. The proprietary fabric lets moisture escape at the same time that it keeps rain, snow, and wind on the outside – all while reflecting your body heat back to you. The Escape Lite™ is no one-trick pony either, use it as a liner to enhance the warmth of your traditional sleeping bag, as an ultra-light weight summer bag or as an emergecy bivvy. Now you really can go further and explore longer!

Product parameters:
• Closed length: 16x8x8 cm
• Weight: 165 g
• Dimensions: 81x208 cm
