Cold Steel has been a long time believer in the ferocious cutting power of a well-designed Viking Axe. Until recently, we lacked the technical ability to make one to our satisfaction. However, with our new state-of-the-art forging facility, we can offer our customers something truly exceptional.

Our Viking Axe's formidably long, thin blade is fully polished and hand sharpened to a bone-splitting, shield shattering edge. It comes with a robust 10" cutting surface that terminates in two sharp horns or points. Traditionally, the longer top point was used for stabbing, gouging, or parrying, while the slightly shorter bottom point was used to capture an opponent's shield or to hook and immobilize his neck, arms, or legs.

To maximize leverage, strength, and dexterity of movement, the Viking Axe is equipped with a very strong, resilient haft. Made in Maine from the best hickory available, it enhances and amplifies our Viking Axe's lethal potential as a cutting, chopping and stabbing weapon.

Product parameters:

- Weight: 2,1 kg
- Blade thickness: 3 mm
- Blade length: 26,2 cm
- Handle length: 121,9 cm
- Steel: 1055
