Symmetry, Grace, and Power. These three words describe the Emerson Model A100 knife perfectly. When I first started making knives, before "Tactical", I was making this pattern. I liked it then just as much as I like it now. This knife became the archetype from which all of my other designs have evolved. It is the "Father" of all my tactical designs. In fact it might be the "Grandfather" of all tactical knife designs that now exist. It's simple, it works, and it never gives up. See for yourself. Black finish 154CM stainless serrated blade with thumb lug. Black G-10 handles with black finish stainless pocket clip. Lanyard hole.

Product parameters:

- Total length: 21 cm
- Blade length: 9 cm
- Blade thickness: 3 mm
- Hardness: 57-59 RC
