Leatherman has incorporated both advanced functionality and safety into a top-of-the-line, fixed blade hunting knife. The rotating handle covers the blade for safety, simultaneously exposing a generous gut hook that's easy to hold, use and sharpen. Also included in the handle is an aggressive bone saw that locks into place over the 3.75 drop-point blade. The knife blade and gut hook, constructed of S30V steel, deliver the best combination of edge retention, flexibility and hardness and can be sharpened with conventional stones. Full leather sheath and a diamond-coated sharpening rod are included.
